

## DAY CREME

50 ml

Thank you for choosing revitalizing and regenerating day cream from the Cellular Collagen™ Care Line. We believe that this cosmetic product will fulfill your highest expectations. Cellular Collagen™ Care Line includes preparations based on cellular collagen. Cellular collagen is extracted from fresh marine sources and is harmonious, consistent and highly compatible with human collagen. Collagen is a potent protein which accounts for approximately 25% of the total mass of protein contained in the human body. With age, the body loses its ability to reproduce natural collagen; wrinkles appear, the skin loses its moisture, nails and hair become dull and the inevitable process of aging sets in. It is possible to slow down the signs of aging by providing the skin with an external source of natural exclusive collagen to ensure its elasticity, firmness, healthy looks and sufficient hydration to ensure the proper functioning of skin cells. Cellular Collagen™ Day Cream revitalizing and regenerating cream is used for the face and neck area care. It is recommended for every skin type, even for very demanding skin. Due to its silky and light consistency, it is perfectly absorbed, gently protects and nourishes.

Cellular Collagen™ Day Cream delays the skin aging processes and has anti-wrinkle properties. Specially selected cream ingredients quickly regenerate and smoothen even very damaged skin. They reinforce its resilience, improve firmness and act against flabbiness. Natural collagen contained in the cream maintains appropriate skin moisture levels by creating a special protective film on its surface for many hours. Cellular Collagen™ Day Cream makes your skin even, smooth, silky, intensively moisturized and resilient.

### TIPS!

Cellular Collagen™ Day Cream revitalizing and regenerating cream acts most effectively when combined with Cellular Collagen™ Night Cream repair and restore cream, Cellular Collagen™ Eye Cream intense anti-wrinkle moisture recharge or Cellular Collagen™ Serum, available in the Cellular Collagen™ Line series:

- Apply Cellular Collagen™ Serum (gel with a high content of exclusive collagen) to clean and dry face and neck area.
- Using your fingertips gently dab the gel onto the skin.
- Wait 10 minutes until gel is completely absorbed and you will feel a slight skin tension.
- Apply a small amount of Cellular Collagen™ Day Cream revitalizing and regenerating cream (in the morning) or Cellular Collagen™ Night Cream repair and restore (in the evening) and Cellular Collagen™ Eye Cream intense anti-wrinkle moisture recharge. Gently dab the cosmetics onto the skin. Product for external use only. Product must not be swallowed. Keep away from children. Avoid direct eye contact. Keep away from direct sunlight. It is recommended that the product is stored in a cool place. Best before: date and serial number inscribed on the base of the packaging. This product is not tested on animals. The manufacturer is not responsible for damage as a result of inappropriate use or storage of the product. Manufactured according to the standards of GMP - Cosmetics.
